

Wizard Battle

Premise

Wizard Battle is a turn-based game where two players fight using minions until one player loses all of them.

The game is played on a **9x9 board**.

Each player summons minions from their own side of the board and uses them to move and attack enemy minions.

Movement and attack ranges are always limited by the edges of the board.

Starting

When you open the game, the main screen appears.

Press **Start** to begin.

Next, you can choose between two maps using the **L** and **R** buttons. More maps may be added in the future.

Press **Select** to confirm the map and start the battle.

Turns

At the beginning of the game, each player starts with **6 skulls**.

Skulls are used to:

- Summon minions.
- Perform attacks.

Press **Start** during your turn to enter selector mode.

You can then choose between:

- **Summon** using **L**.
- **Action** using **R**.

Press **Start** again to confirm your selection.

Summon

While in Summon mode, players can only summon minions in the first column on their side of the board.

Use **L** and **R** to select the minion you want to summon.

Press **A** to summon the selected minion on the cell where the selector is located.

You can see the summon cost of each minion by moving the selector over it.

- If you can afford the minion, the required skulls are shown in **green**.

- If you cannot afford it, the required skulls are shown in **red**.

Once you have summoned minions, you can switch to Action mode to move or attack.

Action

While in Action mode, you can switch between:

- **Move** using **L**.
- **Attack** using **R**.

Move

Each turn, you have **2 movement points**.

Moving a minion once consumes **1 movement point**.

You can therefore perform up to two movements per turn.

You may use both movement points on the same minion or use them on different minions.

Each minion has its own movement range.

Attack

Each minion can attack **once per turn**.

Attacks consume skulls, and every minion has its own attack cost and attack range.

All attacks deal **1 damage**, unless otherwise specified.

Pass Turn

To end your turn, hold **Select** for 1 second.

The other player's turn will then begin.

Game Rules

- The game is played on a **9x9 board**.
- Each minion can only be summoned once.
- You can have up to **4 minions** on the board at the same time.
- Each turn, you receive **4 skulls**.
- You can hold a maximum of **6 skulls**.
- Each minion can attack once per turn.
- Each turn, you have 2 movement points.
- When one player loses all their minions, the game ends and the other player wins.
- If no damage is dealt for **10 turns**, the game ends and both players lose.

From here, you already know everything required to start playing.

If you want more information about the minions and their abilities, continue reading.

Minions

This version of the game includes **6 playable minions**.

Each minion has the following stats:

- **Health**
- **Summon Cost**
- **Damage**
- **Attack Cost**

Each minion also has its own **Movement Range** and **Attack Range**.

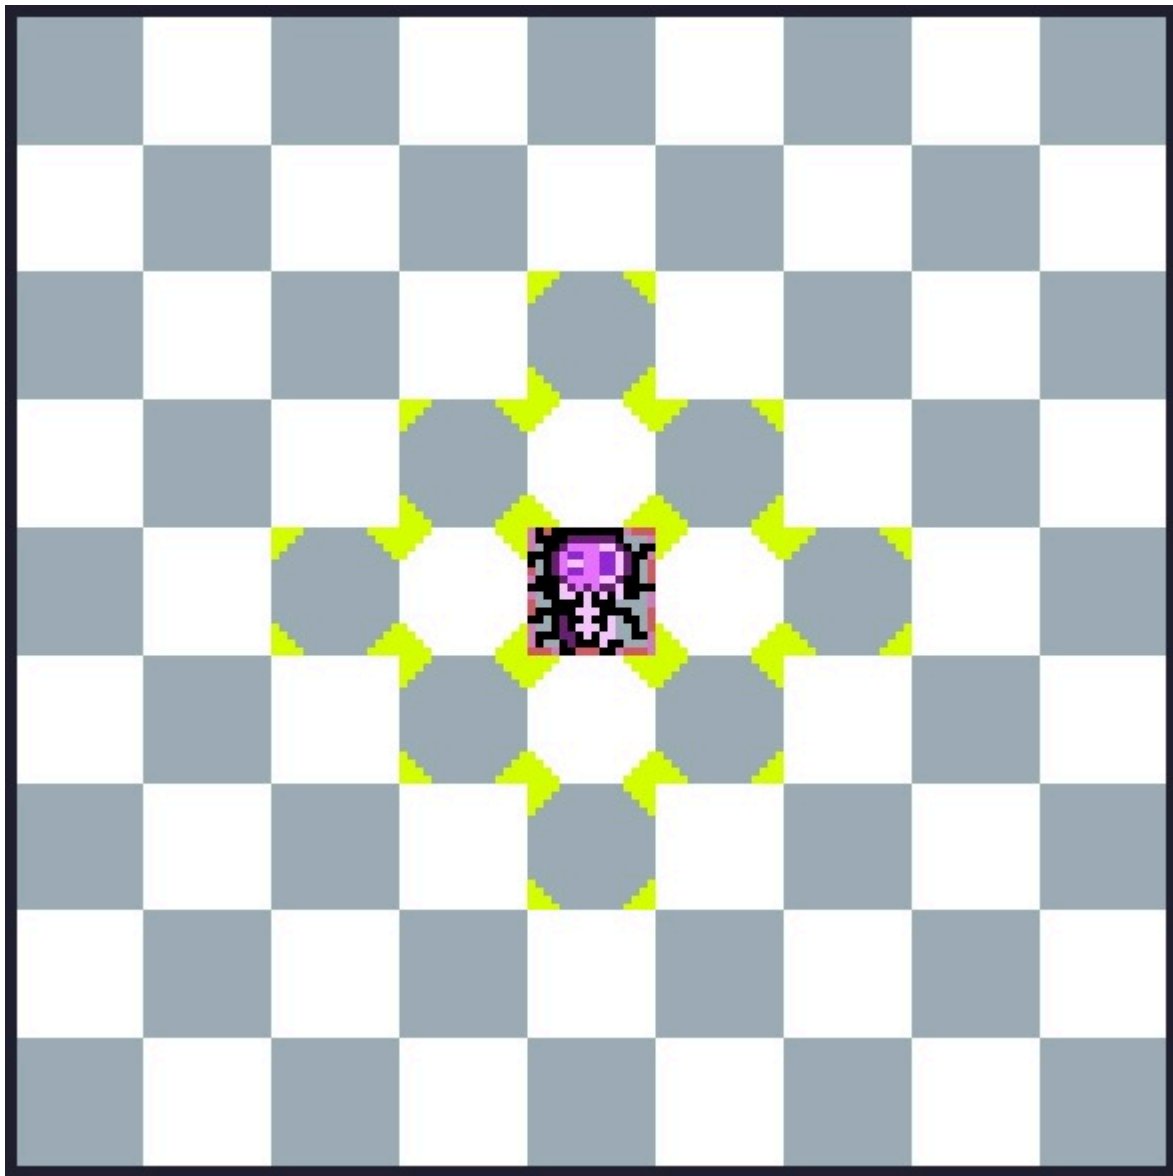

In the following diagrams:

- The minion is shown at the center of the board.
- The highlighted cells in the movement images indicate where the minion can move.
- The highlighted cells in the attack images indicate where the minion can attack.
- All ranges are limited by the edges of the 9x9 board.

Cyborg

- Health: 3
- Summon Cost: 2
- Damage: 1
- Attack Cost: 2

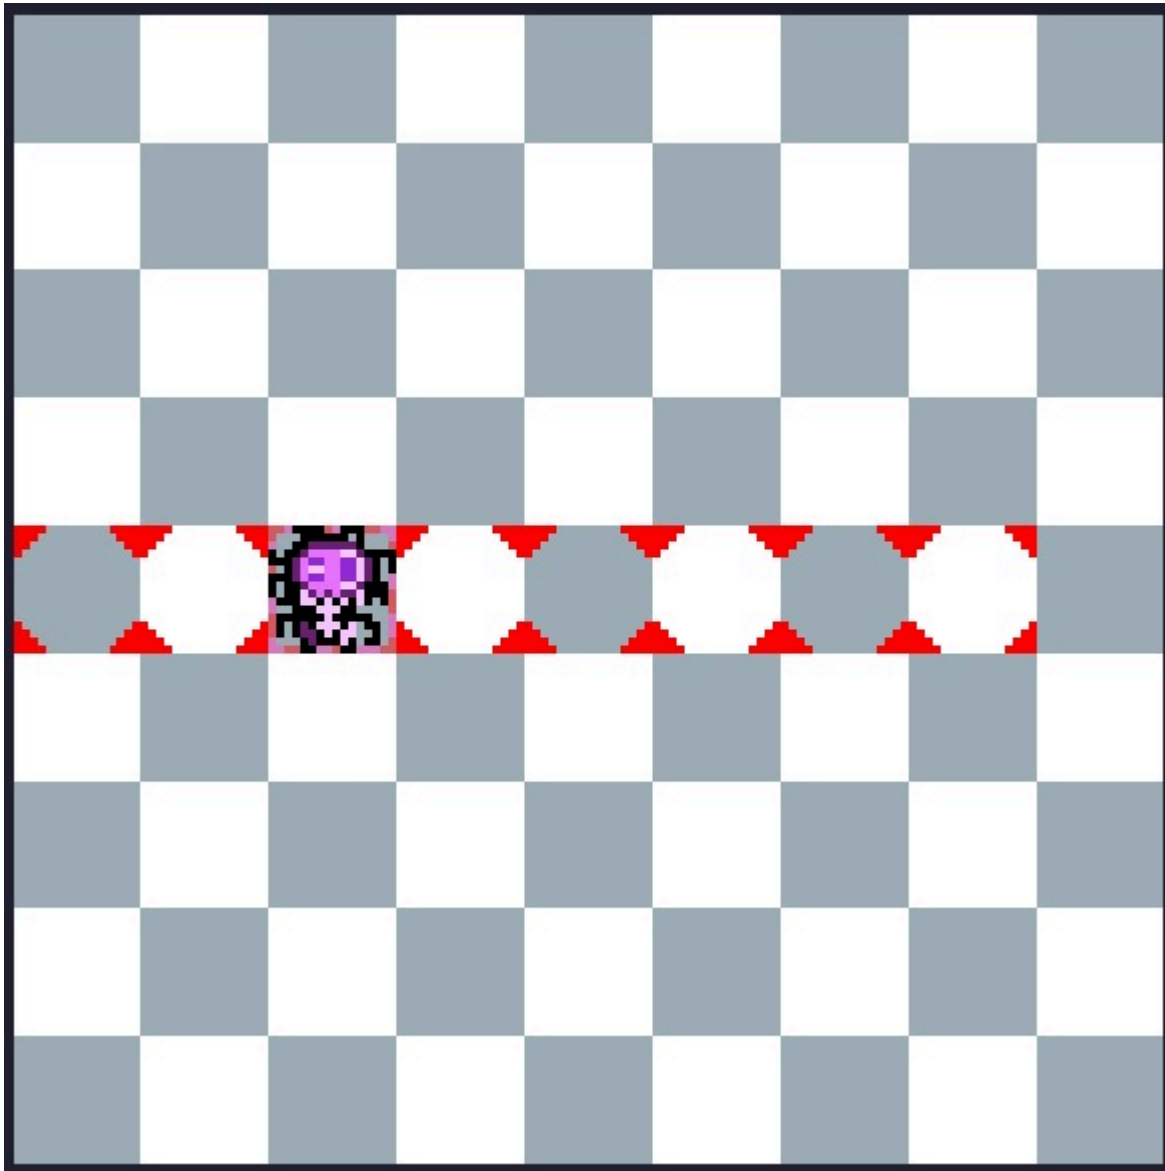

Movement Range

Cyborg can move to any cell within **2 horizontal or vertical steps** of its current position with each movement point.

This includes diagonally adjacent cells that can be reached by combining one horizontal and one vertical step.

Attack Range

Cyborg can attack any enemy located on the **same row**, up to **5 cells away** in either direction.

Attack Effect

Cyborg fires a projectile directly at the selected target.

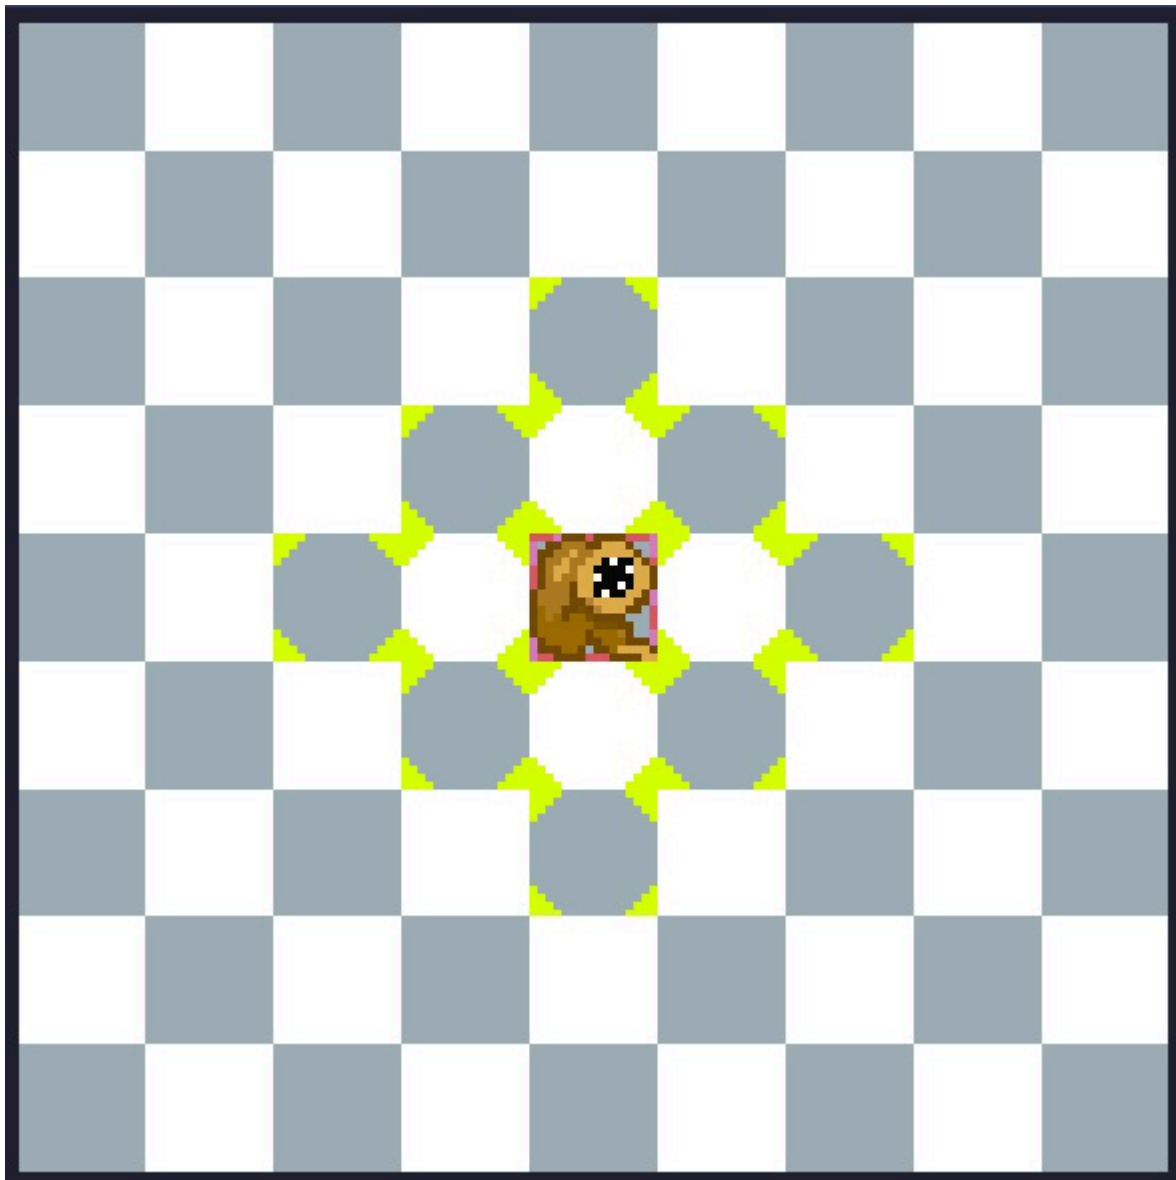

The projectile **passes through walls and other minions**, so enemies or obstacles between Cyborg and the selected target do not block the attack.

 Cyborg Attack Demo

Worm

- Health: 3
- Summon Cost: 2
- Damage: 1
- Attack Cost: 3

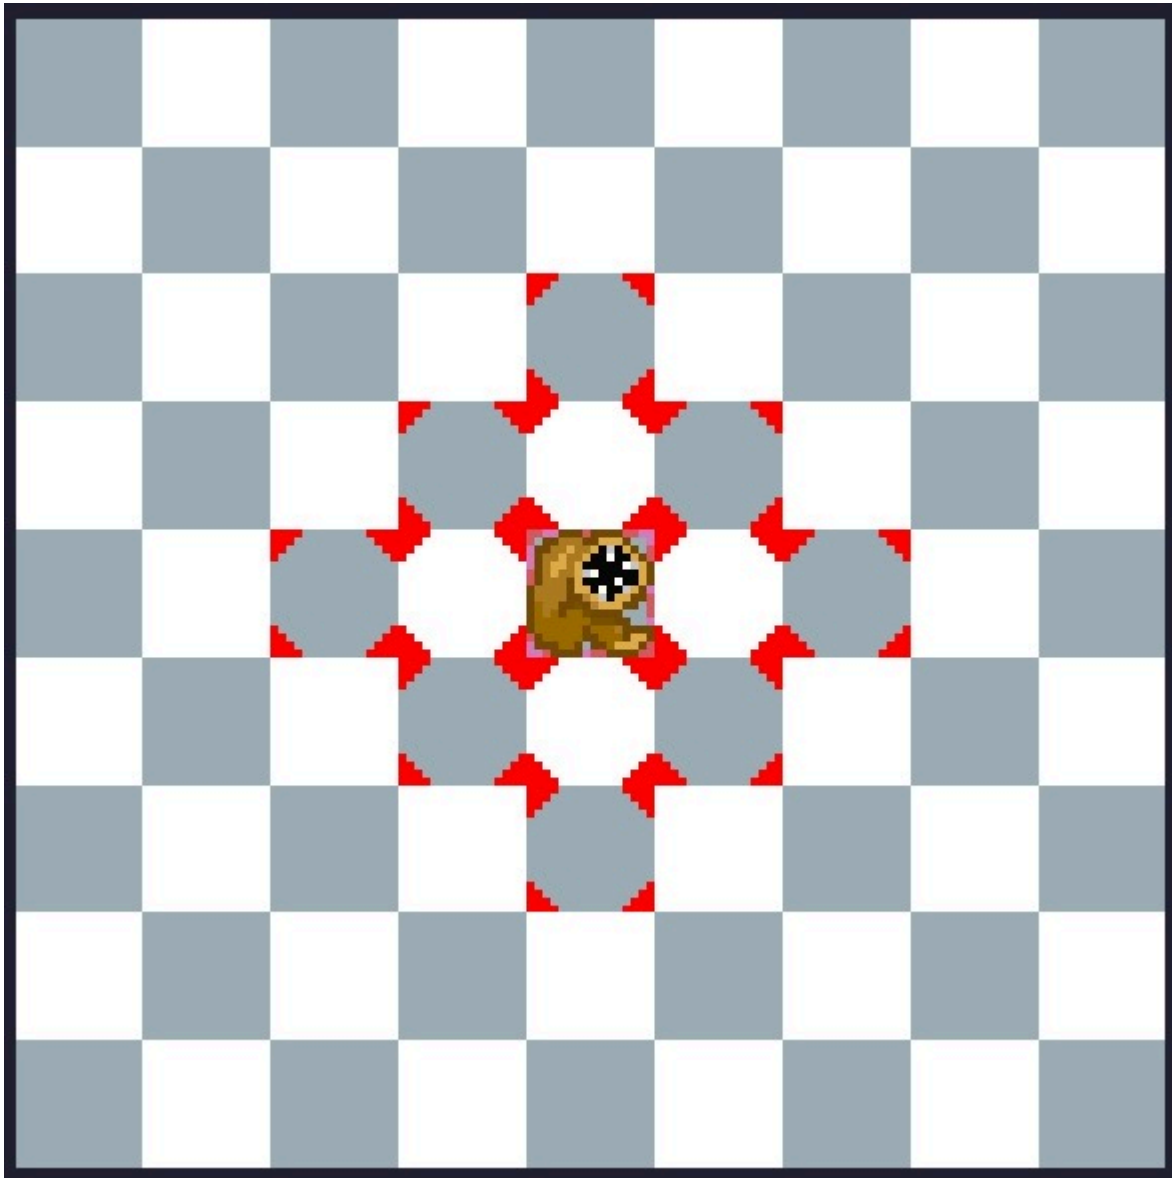

Movement Range

Worm can move to any cell within **2 horizontal or vertical steps** of its current position with each movement point.

This includes diagonally adjacent cells that can be reached by combining one horizontal and one vertical step.

Attack Range

Worm can attack any enemy within **2 horizontal or vertical steps** of its current position.

Attack Effect

Worm damages the selected target and **prevents it from moving during its next turn**.

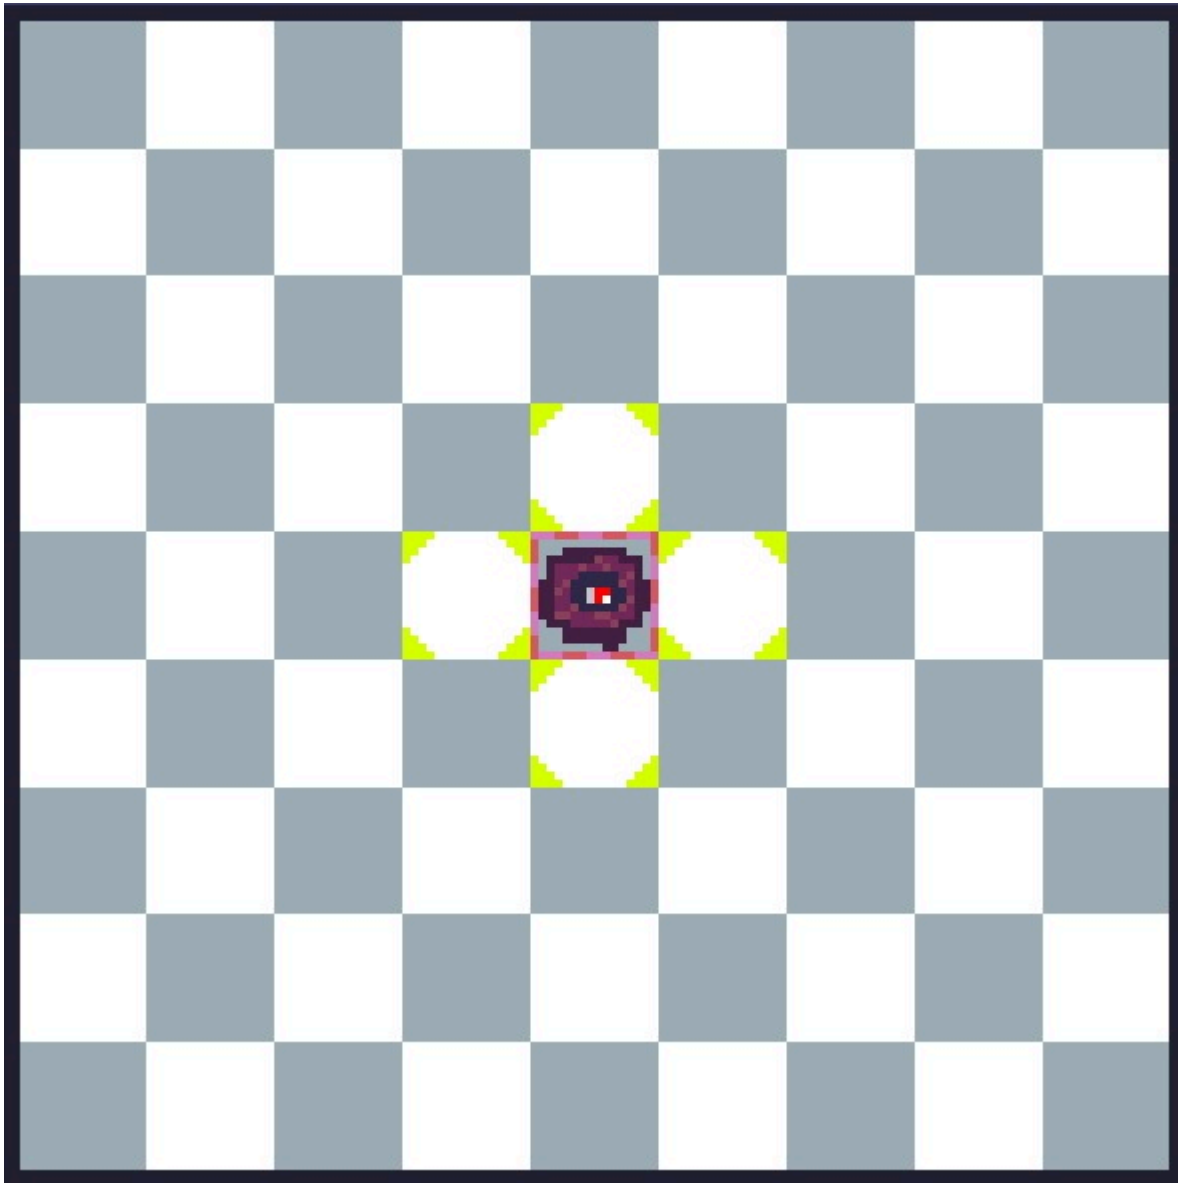

The affected minion can still attack normally.

 Worm Attack Demo

Eye

- Health: 2
- Summon Cost: 2
- Damage: 1
- Attack Cost: 2

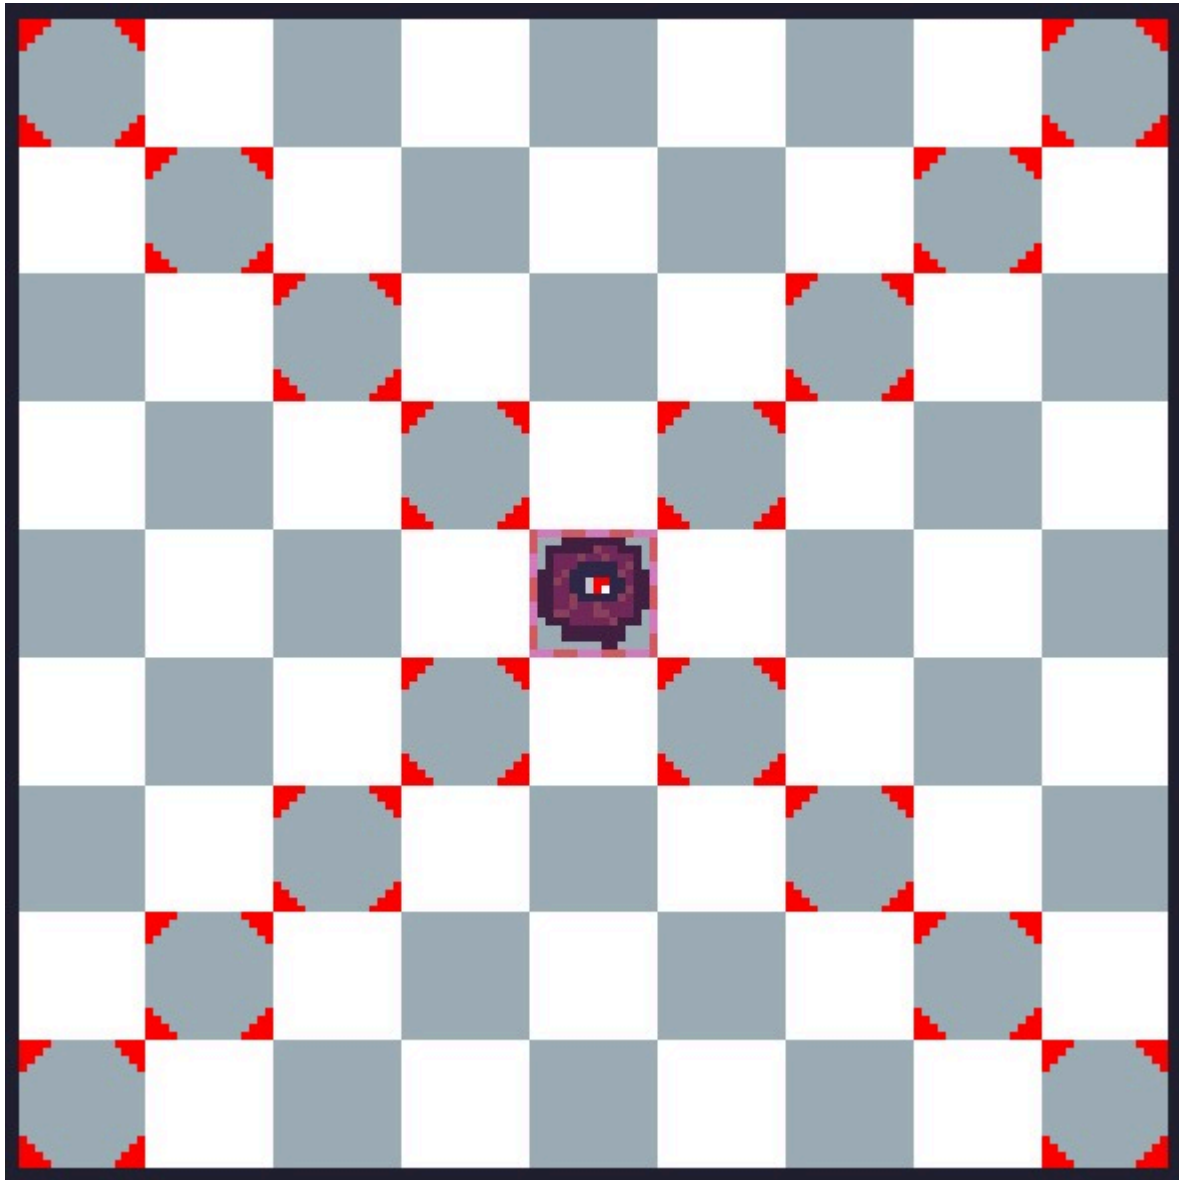

Movement Range

Eye can move **1 cell horizontally or vertically** with each movement point.

It cannot move diagonally.

Attack Range

Eye can attack any enemy located on any **diagonal** from its current position, regardless of distance.

Attack Effect

Eye damages the selected target and **teleports it to the opposite side of the board**.

The target's position is mirrored through the center of the board.

For example, using the center of the board as $(0, 0)$, a minion at (x, y) is teleported to $(-x, -y)$.

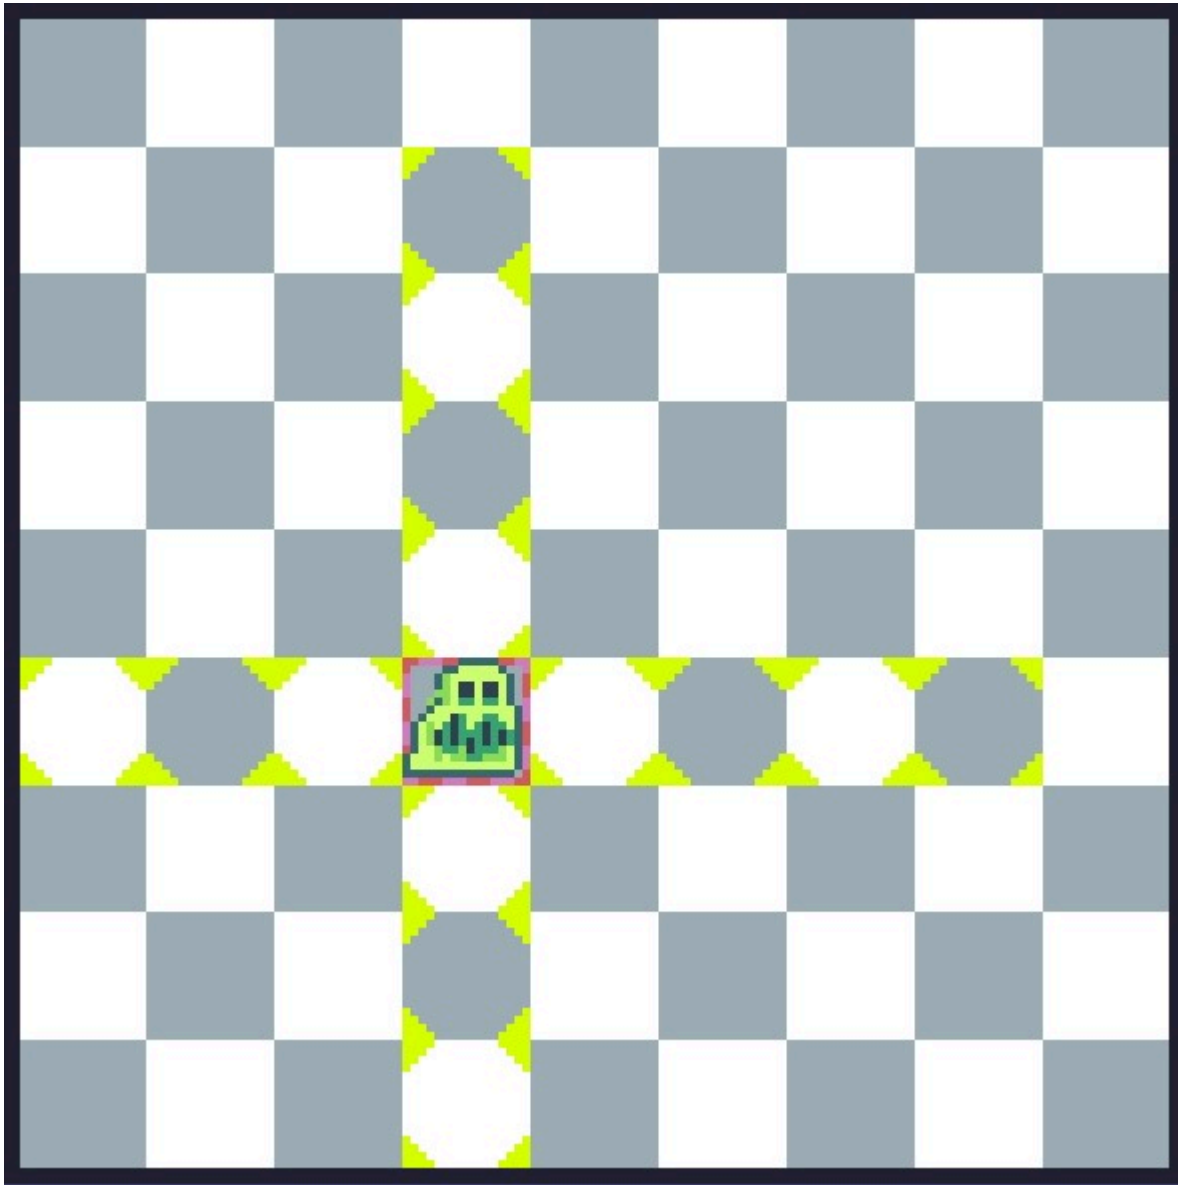

Eye Attack Demo

Slime

- Health: 3
- Summon Cost: 1
- Damage: 1
- Attack Cost: 2

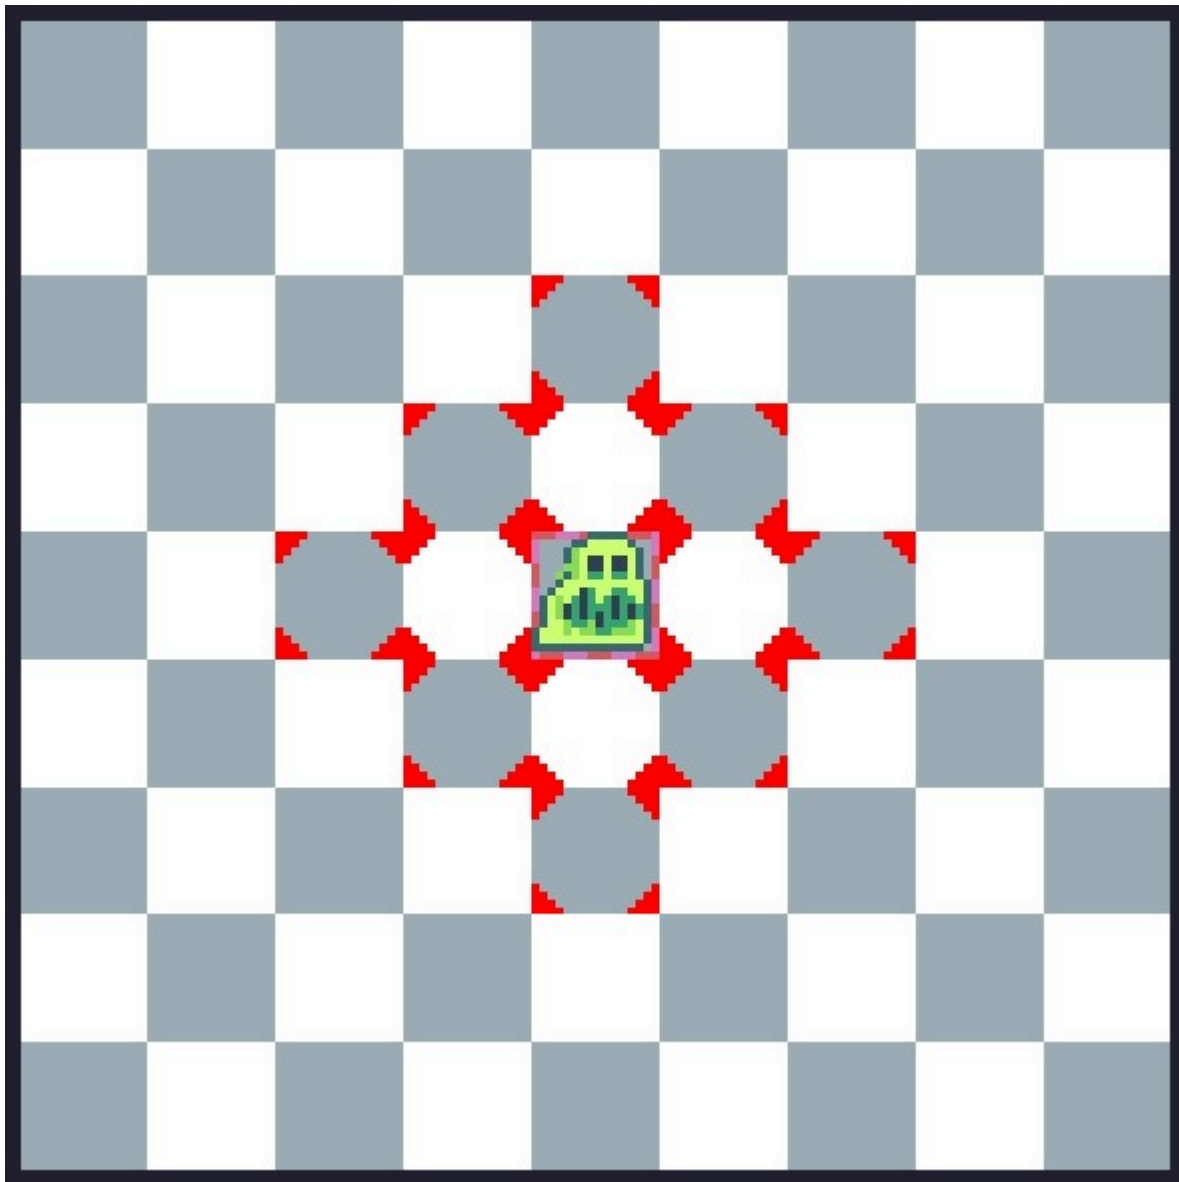

Movement Range

Slime can move up to **4 cells horizontally or vertically** with each movement point.

It cannot move diagonally.

Attack Range

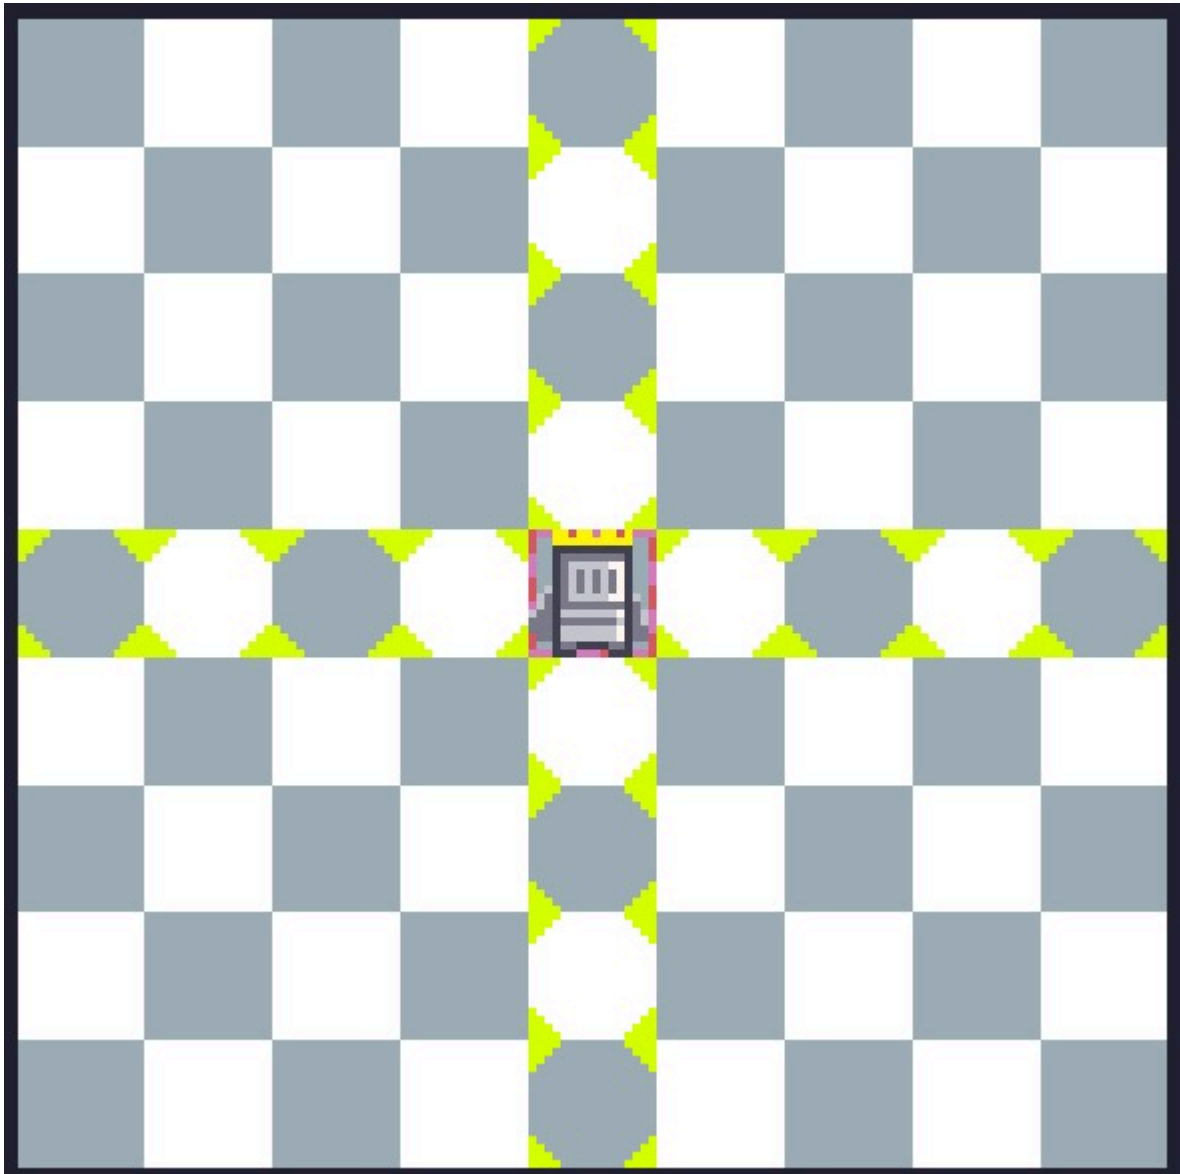

Slime can attack any enemy within **2 horizontal or vertical steps** of its current position.

 Slime Attack Demo

Knight

- Health: 3
- Summon Cost: 3
- Damage: 1
- Attack Cost: 3

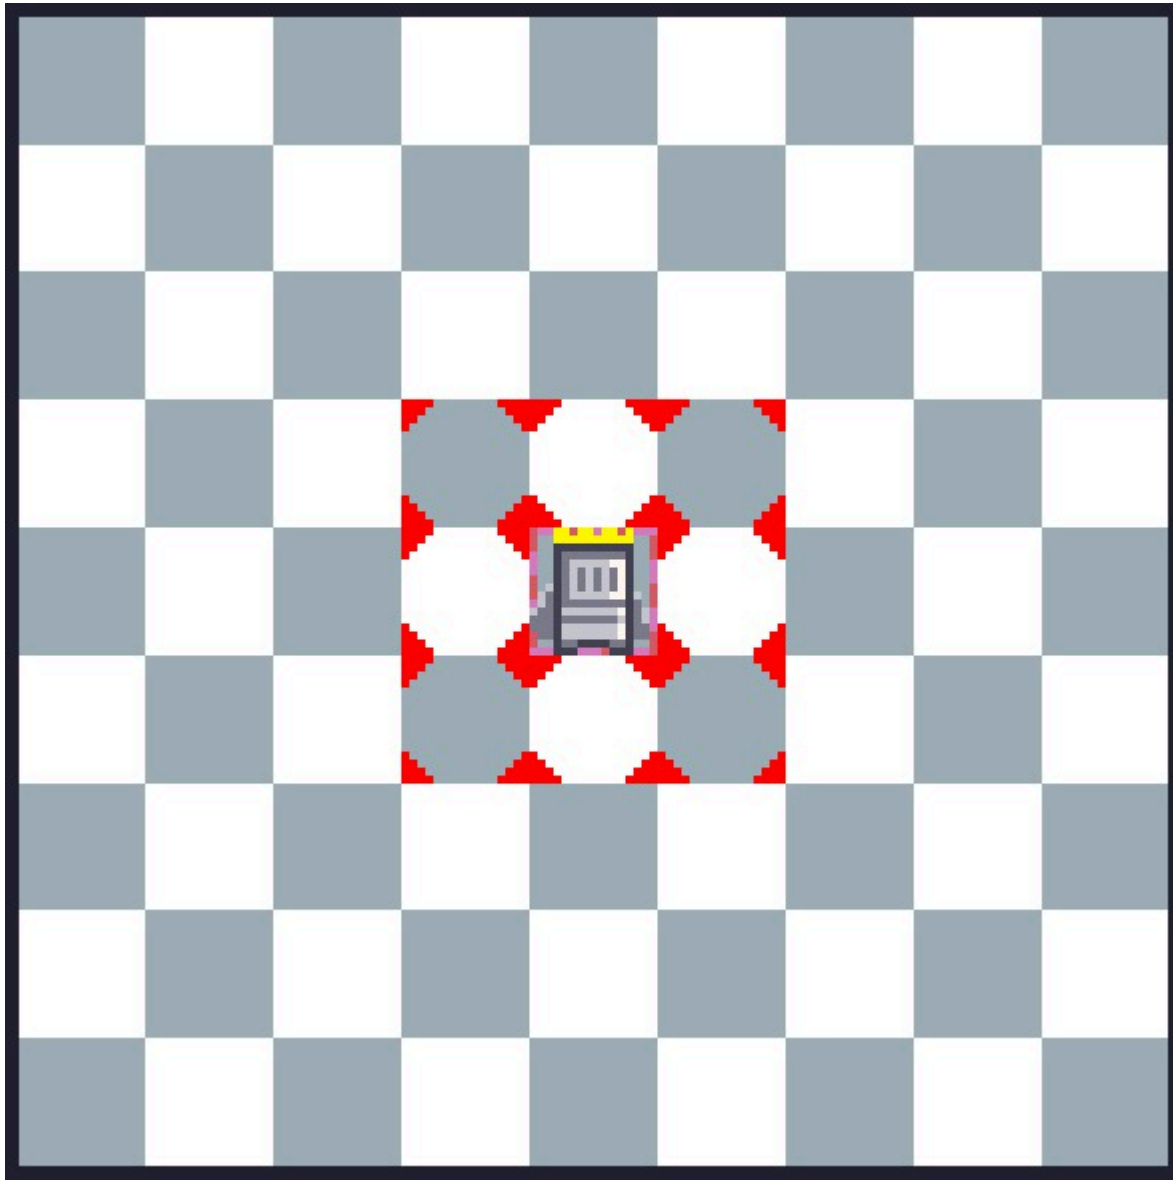

Movement Range

Knight can move any number of cells **horizontally or vertically** with each movement point, up to the edge of the board.

It cannot move diagonally.

Attack Range

Knight attacks

all 8 surrounding cells at the same time.

Attack Effect

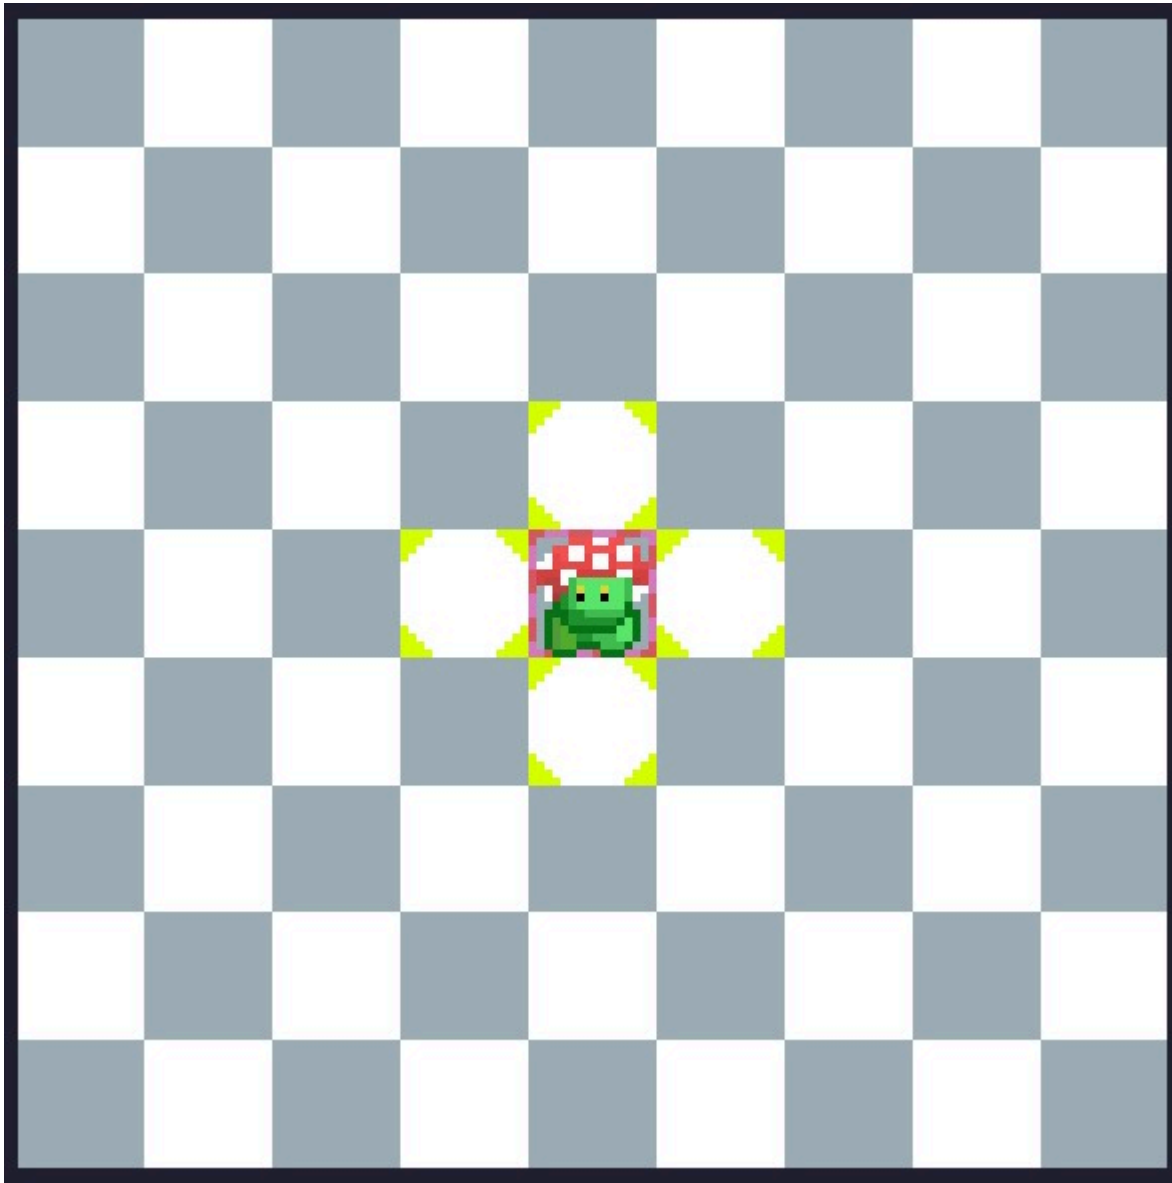

Every enemy located in one of the 8 adjacent cells takes **1 damage**.

 Knight Attack Demo

Mushroom

- Health: 3
- Summon Cost: 2
- Damage: 1
- Attack Cost: 2

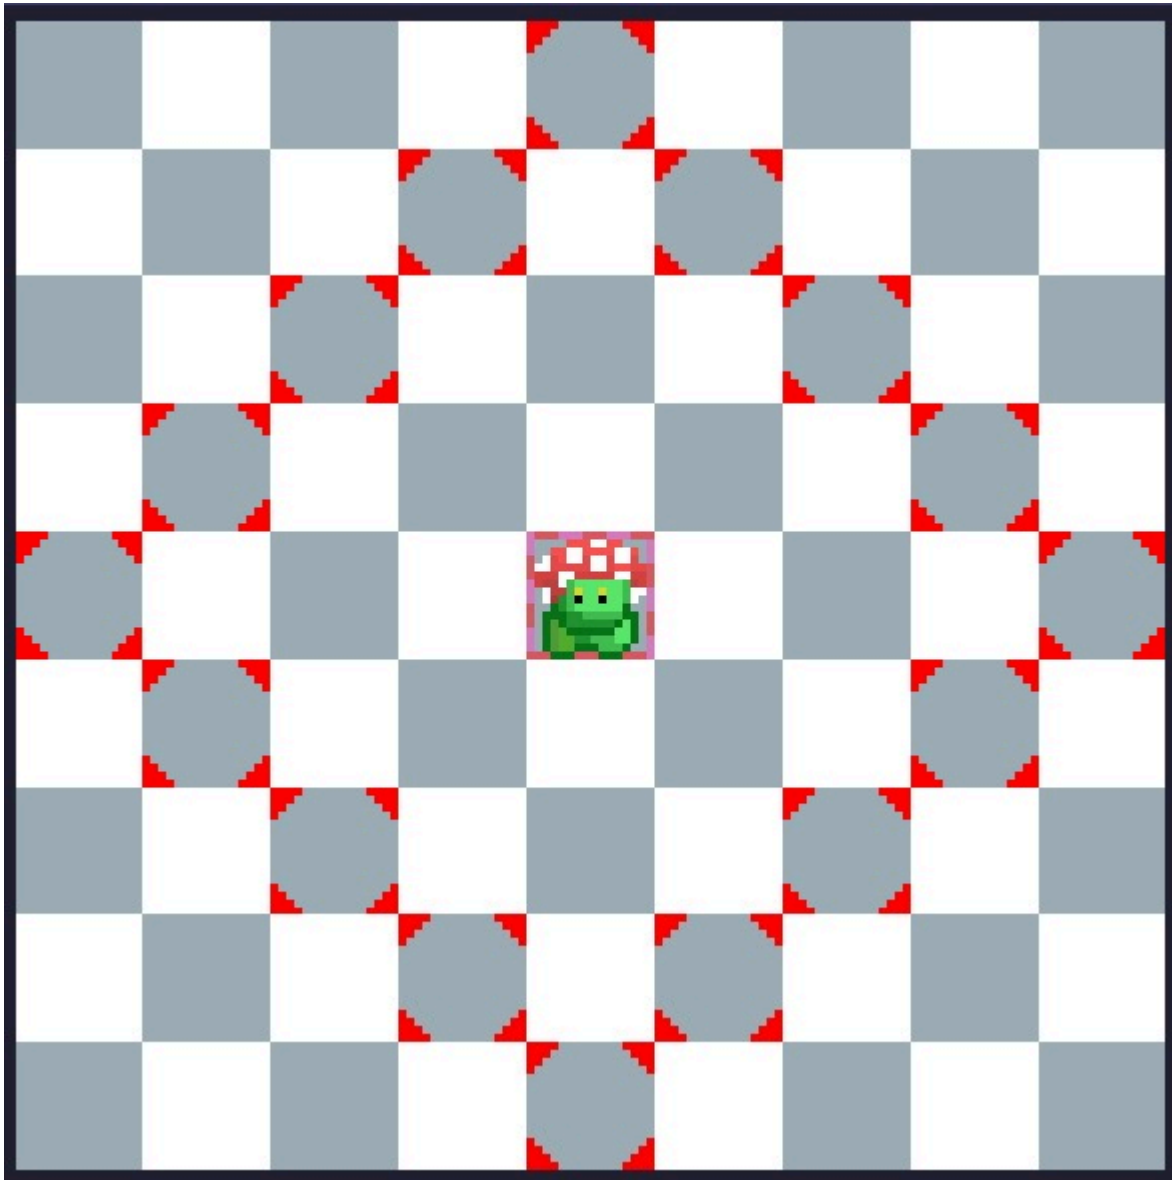

Movement Range

Mushroom can move **1 cell horizontally or vertically** with each movement point.

It cannot move diagonally.

Attack Range

Mushroom can attack any enemy located **exactly 4 horizontal or vertical steps away** from its current position.

This creates a **diamond-shaped attack range** around the Mushroom.

Attack Effect

Mushroom deals **1 damage** to the selected target.

It also deals **1 damage to every other enemy located on the same row as the selected target.**
